Foundation Preparation

1.1 Clear the area where you want to build the shed and layout for the foundation. Use the below illustration as a guide.

1.2 For the foundation, dig the trenches at least 1’ wide and 1’ deep.

1.3 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.

1.4 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 100 bricks for this step.
**Framing the Floor**

2.1 Assemble the frame using 1 1/2” x 7 1/4” pressure-treated lumber. You will need seven boards cut to 5’-9” that will be the joist.

2.2 Secure the beams with 8x5” wood screws.

2.3 Using a speed square or carpenter’s square, check the corners to make sure they are 90°.
STEP 3

Install the Plywood Floor

3.1 Prepare the 9/16" plywood for the floor sheathing according to the drawing. You will need two 4' x 6' sheets.
3.2 Secure the plywood with 2" wood screws.
Assemble Front Wall Frame

4.1 Using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” pressure-treated lumber, construct front wall frame using the drawing below as a reference. You will need three boards cut to 11” that will be the cripple studs, one board cut to 5’-4” that will be the door header, six boards cut to 6’-11” that will be the studs, two boards cut to 1’-4” that will be the bottom plates and one board cut to 8’ that will be the top plate.

4.2 Connect the beams with 2x4” wood screws.

4.3 Using a speed square or carpenter’s square, check the corners to make sure they are 90°.
Assemble Back Wall Frame

5.1 Using 1 1/2” x 3 1/2” and 3 1/2” x 3 1/2” pressure-treated lumber, construct back wall frame using the drawing below as a reference. You will need seven boards cut to 6’-11” that will be the studs and two boards cut to 8’ that will be the top and bottom plates.

5.2 Connect the beams with 2x4” wood screws.

5.3 Using a speed square or carpenter’s square, check the corners to make sure they are 90°.
Assemble Left and Right Wall Frames

6.1 Using 1 1/2" x 3 1/2" pressure-treated lumber, construct wall frames using the drawing below as a reference. You will need six boards cut to 6'-11" that will be the studs and two boards cut to 5'-5" that will be the top and bottom plates.

6.2 Connect the beams with 2x4" wood screws.

6.3 Using a speed square or carpenter's square, check the corners to make sure they are 90°.
Assemble the Roof Frame

7.1 Using 1 1/2” x 5 1/2” pressure-treated lumber, cut sixteen rafters 5’-5 1/2” long according to the dimensions.

7.2 Using 1 1/2” x 3 1/2” pressure-treated lumber, cut six collar ties 4’-6” long according to the dimensions.

7.3 Using 3/4” x 7 1/4” pressure-treated board, cut the ridge board 8’ long according the illustration below.

7.4 Connect the beams with 2x3” wood screws.
Assemble the Rafter Bays

8.1 Cut 14 rafter bays 1’ long using 3/4” x 5 3/4 ” pressure-treated lumber.

8.2 Cut the top edge of each stud to connect them with rafters.

8.3 Connect the beams with 2x4” wood screws.
Assemble and Install Shed Doors

9.1 Build the door frames for the shed using 1 1/2 “ x 3 1/2 “ pressure-treated lumber and secure with 5” wood screws. You will need two boards cut to 5'-11 3/4” that will be the vertical girts and two boards cut to 2'-3/4” that will be the horizontal girts.

9.2 Prepare the 9/16” plywood sheet with dimensions 2'-7 3/4” x 5'-11 3/4” for the doors according to the drawing.

9.3 Use 2 1/2 “ x 3/4 “ pressure-treated lumber for the door trim and fasten with 2” wood screws. You will need two boards cut to 2'-2 3/4” and two boards cut to 5'-11 3/4”.

9.4 Using 1/4 “ x 3/4 “ pressure-treated lumber, cut and install a starter course 2'-2 3/4” long.

9.5 For the exterior siding on the door, use 1/2 “ x 6” wood siding boards and the illustration below as a reference.

9.6 Assemble siding shields with 2” galvanized nails.

9.7 Install three 3” door hinges using 6x1” wood screws. Finish the doors installation by attaching 4” surface bolts and 6” door pulls.
Shed's Back Wall Ventilation

10.1 Install 12” x 12” wood square louver gable vent in the openings of side walls.

10.2 Secure with 4x3” wood screws.
Roof Sheathing Installation

11.1 You will need 100 Sq Ft of asphalt shingle roofing.

11.2 Add the metal drip edge to the fascias.

11.3 Cover the plywood with building paper.

11.4 Install asphalt shingle roofing using an industrial stapler.
Shed Decoration

Now that your coop is all done, you are ready to decorate it any way you want using your favorite paint, stain, or preservative.
