## 6'x8' Storage Shed Material List

## Site Preparation

- Concrete
- Bricks

## Bottom Frame

- Pressure-Treated Lumber
- Plywood

## Wall Frames

- Pressure-Treated Lumber

## Shed's Roof

- Pressure-Treated Lumber
- Pressure-Treated Board
- Plywood
- Building paper
- Asphalt shingles
- Metal drip edge

## Shed's Door

- Pressure-Treated Lumber
- Wood siding boards
- Plywood

## Walls Exterior Siding

- Pressure-Treated Lumber
- Wood siding boards

## Top Frame

- Pressure-Treated Lumber

## Fasteners \& Hardware

- Door hinges
- Door pulls
- Surface bolt
- Galvanized nails
- Wood screws

## STEP 1

## Foundation Preparation

1.1 Fill the trenches to ground level with concrete and let cure, or harden. Since curing times vary between brands, read the packaging for recommended curing times.
1.2 Once the concrete has cured, use standard-sized bricks and lay them across the foundation. You will need roughly 100 bricks for this step.

## STEP 2

## Framing the Floor

2.1 Assemble the frame using $11 / 2^{\prime \prime} \times 71 / 4^{\prime \prime}$ pressure-treated lumber. You will need seven boards cut to $5^{\prime}-9$ " that will be the joist.
2.2 Secure the beams with $8 \times 5$ " wood screws.
2.3 Using a speed square or carpenter's square, check the corners to make sure they are $90^{\circ}$.

## STEP 3

## Install the Plywood Floor

3.1 Prepare the 9/16" plywood for the floor sheathing according to the drawing. You will need two 4' x 6' sheets.
3.2 Secure the plywood with 2" wood screws.

## STEP 4

## Assemble Front Wall Frame

4.1 Using $11 / 2^{\prime \prime} \times 31 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime} \times 31 / 2^{" \prime}$ pressure-treated lumber, construct front wall frame using the drawing below as a reference. You will need three boards cut to 11 " that will be the cripple studs, one board cut to $5^{\prime}-4$ " that will be the door header, four boards cut to $6^{\prime}-11$ " that will be the studs, two boards cut to $1^{\prime}-4$ " that will be the bottom plates and one board cut to 8 ' that will be the top plate.
4.2 Connect the beams with $2 \times 5$ "wood screws.
4.3 Using a speed square or carpenter's square, check the corners to make sure they are $90^{\circ}$.

## STEP 5

## Assemble Back Wall Frame

5.1 Using $11 / 2^{\prime \prime} \times 31 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime} \times 31 / 2^{\prime \prime}$ pressure-treated lumber, construct back wall frame using the drawing below as a reference. You will need seven boards cut to $6^{\prime}-5$ " that will be the studs and two boards cut to 8 ' that will be the top and bottom plates.
5.2 Connect the beams with $2 \times 3$ " wood screws.
5.3 Using a speed square or carpenter's square, check the corners to make sure they are $90^{\circ}$.

## STEP 6

## Assemble Side Wall Frame

6.1 Using $11 / 2^{\prime \prime} \times 31 / 2^{\prime \prime}$ pressure-treated lumber, construct right wall frame using the drawing below as a reference. You will need six boards cut to 6 '-5" that will be the studs and two boards cut to $5^{\prime}-5$ " that will be the top and bottom plates.
6.2 Connect the beams with $2 \times 3$ " wood screws.
6.3 Using a speed square or carpenter's square, check the corners to make sure they are $90^{\circ}$.

## Assemble The Roof Frame

7.1 Using 1 1/2" x 5 1/2" pressure-treated lumber, cut seven rafters 7'-1 3/4" long according to the dimensions in drawing below. Cut the recesses in each beam for splicing connection with wall frames.
7.2 Connect the beams with a top frame with the help of 5" wood screws.

## STEP 8

## Install Plywood for the Roof

8.1 Cut sheets of $5 / 8^{\prime \prime}$ plywood for the roof sheathing using the drawing below as a guide.

You will need one 1'-9 1/4" x 8' sheet and two 4' x $7^{\prime}-23 / 4$ " sheets.
8.2 Secure the plywood with 2 " wood screws.

## Assemble and Install Shed Doors

9.1 Build the door frames for the shed using $11 / 2^{\prime \prime} \times 3$ 1/2" pressure-treated lumber and secure with 5 " wood screws. You will need two boards cut to $5^{\prime}-113 / 4$ " that will be the vertical girts and two boards cut to 2'-3/4" that will be the horizontal girts.
9.2 Prepare the 5/8" plywood sheet with dimensions $2^{\prime}-73 / 4^{\prime \prime} \times 5^{\prime}-113 / 4$ " for the doors according to the drawing.
9.3 Use 3/4" x 2 1/2" pressure-treated lumber for the door trim and fasten with 2 " wood screws. You will need two boards cut to 2'-2 3/4" and two boards cut to 5'-11 3/4".
9.4 Using 1/4" x 3/4" pressure-treated lumber, cut and install a starter course 2'-2 3/4" long using Node D on page 23 as a reference.
9.5 For the exterior siding on the door, use $1 / 2^{\prime \prime} \times 6^{\prime \prime}$ wood siding boards and the illustration below as a reference.
9.6 Assemble siding shields with 2" galvanized nails.
9.7 Install three 3 " door hinges using $6 \times 1$ " wood screws. Finish the doors installation by attaching 4 " surface bolts and 6 " door pulls (see nodes E, F, G).

## Roof Sheathing Installation

10.1 You will need 75 Sq Ft of building paper and asphalt shingle roofing.
10.2 Cover the plywood and drip edge with building paper. Try to install sheets with 1" overlapping. Use 2" nails to secure the sheets.
10.3 Install asphalt shingle roofing using an industrial stapler.

## Shed Decoration

Now that your shed is all done, you are ready to decorate it any way you want using your favourite paint, stain, or preservative.
